Synergy Companies is a SoCalGas authorized contractor responsible for implementing this program through 12/31/2027.

The Public Direct Install Program is funded by California utility customers and administered by Southern California Gas Company (SoCalGas) under the auspices of the California Public Utilities Commission, through a contract awarded to Synergy Companies. Program funds, including any funds utilized for rebates or incentives, will be allocated on a first-come, first-served basis until such funds are no longer available. This program may be modified or terminated without prior notice. Customers who choose to participate in this program are not obligated to purchase any additional goods or services offered by Synergy or any other third party. The selection, purchase, and ownership of goods and/or services are the sole responsibility of customer. **SoCalGas makes no warranty, whether express or implied, including the warranty of merchantability or fitness for a particular purpose, of goods or services selected by customer. SoCalGas does not endorse, qualify, or guarantee the work of Synergy or any other third party.** Eligibility requirements apply; see the program conditions for details.

Receive no-cost energy upgrades

SoCalGas customers categorized as public education facilities, K-12 schools, local government buildings, and federal government buildings qualify to participate in this no-cost energy-efficiency program. Each site must have an active non-residential SoCalGas account in good standing.

A Public Direct Install Program (PDIP) representative will be available to help you with any specific questions regarding the program.

How the program works

A PDIP representative will visit each of your school sites to determine which energy-efficiency upgrades qualify for professional, no-cost installation.

By participating in this program, these energy-efficient upgrades may help your school district save energy and could lower your energy costs.

No-cost energy-efficient upgrades may include:

- Low-Flow Kitchen Pre-Rinse Spray Valves
- Hot Water Tank Insulation
- Hot Water Pipe Insulation
- Low-Flow Aerators*
- Low-Flow Showerheads
- Commercial Fitting Insulation

Natural gas equipment rebates and financing

A PDIP representative is available to discuss eligible customers rebates on natural gas equipment upgrades along with Zero-Percent On-Bill Financing.

- Natural Gas Storage Water Heater
- Natural Gas Tankless Water Heater
- High-Efficiency Natural Gas Furnace
- Efficiency Infrared Patio Heaters
- Solar Thermal Water Heating

Equipment installations require a copay which can be paid through Zero-Percent On-Bill Financing (OBF).

What is OBF?

OBF allows eligible customers to finance on energy-efficient projects. The loan is conveniently repaid through your utility bill. Other key benefits of the program include:

- No prepayment penalty
- May help lower monthly natural gas usage
- No origination fee

*Measure eligibility and installations are contingent on there being a relationship between SoCalGas and the applicable water utility providing for such a measure.
